

**B. Initial Observations: Visual Cues of Impaired Operation (Automobiles)**

Drivers who are impaired frequently exhibit certain effects or symptoms of impairment. These include:

- Slowed reactions
- Impaired judgment as evidenced by a willingness to take risks
- Impaired vision
- Poor coordination

The next page presents common symptoms of alcohol influence.

This unit focuses on alcohol impairment because research currently provides more information about the effects of alcohol on driving than it does about the effects of other drugs on driving. Remember whether the driver is impaired by alcohol and/or drugs, the law enforcement detection process is the same and the offense is still DWI.
